Evolve Milk Paint

OMBRE PLANTER PAINT KIT

1 Prepare Your Paint

WHIP IT REAL GOOD

Each paint sachet contains 3 tbsp of our creamy dreamy milk paint. Pour each powder sachet into separate containers then add 3 tbsps of water to each one and stir well.

Add more water if needed to get to a whip cream consistency.

Leave the two paints to swell for approx 30 mins. Mix up once the paint has swelled to ensure there are no clumps.

Your paint is now ready!

A BRUSH OF PERFECTION

It's time to get amazing results with our natural paints that will leave your home, you and our planet feeling good.

We go beyond the zero VOC's. Our milk paints, clay paints, furniture wax and hemp oil products are 100% natural.

How incredible is that?! Best of all no paint quality is compromised.

Enjoy timeless colours, easy application, fun techniques and excellent coverage.

2 Ombre Paint the Planter

PAINT THE WHITE RABBIT

Brush the white rabbit on the top half of your planter.

PAINT THE TERRACOTTA

Paint the terracotta on the bottom half of the planter

BLEND IT UP OR DOWN

Choose which way to blend, top down or bottom up. While the paint is wet in both areas use a cleaned brush to blend the colours into each other. Brush from one side all the way to the other.

3 Dry and Repeat Step 2

ADD ANOTHER LAYER OR 2

Once dry repeat step 2 for depth layers and solid colours. Allow project to dry. Add a third layer for more solid lines.

4 Finish It

WAX ON WAX OFF

Feel free to give your project a light sand if you want any spots smoothed out. Apply the furniture wax with a cotton rag or paper towel. Rub on, leave for 30 mins and wipe off any excess. Full cure is 30 days. Use gently till then.

EARTH FRIENDLY

Our milk paints are 100% natural.
